-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Respond to Argument

In response to applicant's remark dated 15 December 2005 the claim 1 is a combination because claim 25 is a part of claim 1, claim 1 has most of claim 25, claim 1 requires the combination of the power conversion apparatus plus all the limitation of claim 25, except the limitation applicant contains are added and the added limitation are the particulars of the subcombination not required in the combination. Also the UPS limitations are particulars of the subcombination not required. Since the restriction requirement is maintained.

Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20 and 40-47 are drawn to power conversion apparatus, classified in class 363, and subclass 89.
- II. Claims 25-39 are drawn to Uninterrupted Power Supply, classified in class 307, and subclass 66.

The inventions are distinct, each from the other because of the following reasons:

1. Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for

Art Unit: 2838

patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination of Group I, as claimed does not require the particulars of the subcombination as claimed because combination does not require 'DC voltage from either or both of a first power source and a second power source,' which is required for group II and Group of power conversion apparatus of power supply of Group I can be used for power conversion where only one power source is available for load circuit (from AC source to DC source).

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rajnikant B. Patel whose telephone number is 571-272-2082. The examiner can normally be reached on 6.30-5.00; m-f.
